

## FERRONOVA® Process Supports Extranet – Your Knowledge Base on the Net.

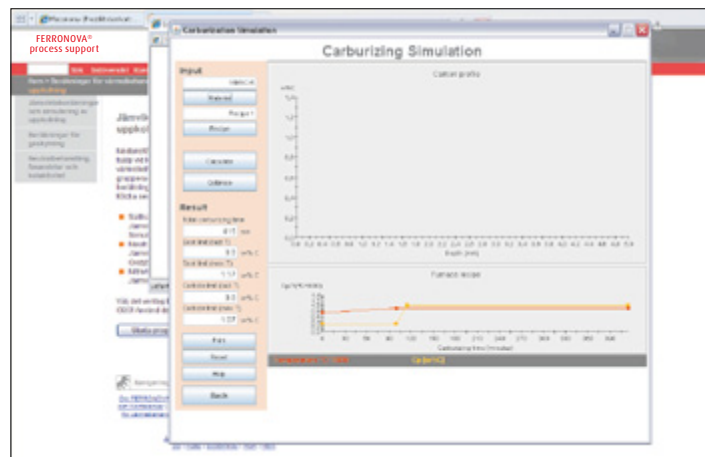

### Extranet for FERRONOVA® process support

Our extranet at [www.ferronova.se](http://www.ferronova.se) gives you quick and simple access to our combined knowledge of heat treatment processes, directly on the internet. Here you'll find easy-to-use calculator tools, enabling you to improve your process, information on safety regulations, risks, and equipment, plus a glossary and events diary. As a member, you also have a personal section, where you can access your own service reports and agreements online.

### Like having some of Sweden's best experts right by your side

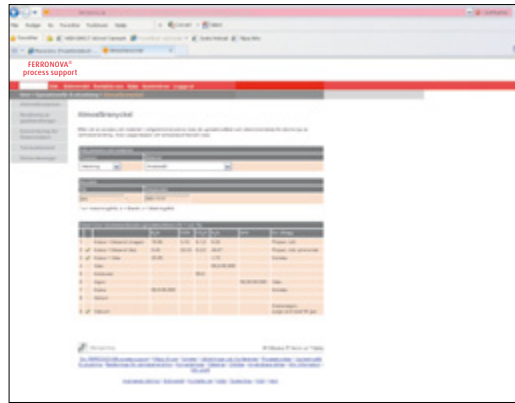

When you log in to [www.ferronova.se](http://www.ferronova.se) you can instantly select what you want to do, or know more about. You can find help for every step of the way. If you need help with calculations, for example, you can have a look on our help pages. You can also pose questions directly to some of Sweden's most knowledgeable and experienced specialists and engineers in their field.

### Process calculations

There are also calculation tools that you can use for control and improvement of your heat treatment processes. For example; simulation of carburizing and the furnace atmospheres required; calculations of the oxidation limits for neutral hardening and the furnace atmospheres needed to achieve them; and tools to calculate the atmosphere requirements for nitriding.

Furnace atmosphere and equipment

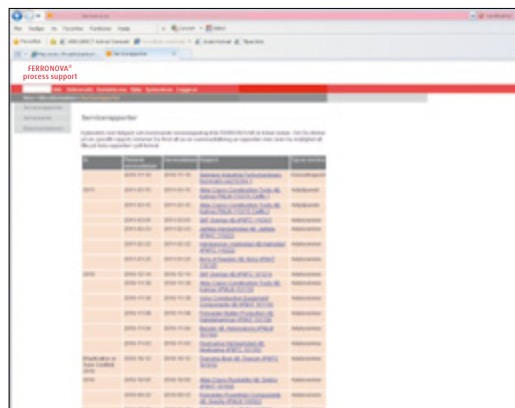

Here you can get help with selecting the furnace atmosphere. After selecting the process and material, the furnace atmosphere recommended for the selected type of heat treatment is shown. The surface properties and temperature intervals are also shown.

Glossary

On the FERRONOVA® process support extranet, there is also a comprehensive dictionary for the heat treatment industry in several languages. Click the word to see a more detailed page with definitions and notes.

Customer archive on the internet

There is also a section that is only visible to you and your company. Here you can find reports and information that our service engineers have compiled specifically for your company, such as previously conducted and upcoming service assignments.

By clicking on a specific report, you can see a summary and you can also download the entire report as a PDF.
