

R422A (Freon™/ISCEON M079). R422A is a HFC blend used as R22 and R502 replacement.

Introduction

R422A, also known as ISCEON® M079, is a HFC blend for replacing R22, R502 and HCFC-containing refrigerant blends such as R402A, R402B and R409A in low temperature commercial and industrial direct expansion refrigeration systems. It can also be used for medium temperature systems.

Specifics/facts

Substitute for R22, R502 and HCFC containing blends. Zeotropic refrigerant blend containing R125, R134a and R600a.

Product specification

Cylinder size in litres	Content in kg	Item number
12	11	114295
61	53	114296*

*61L only on request

Advantages

- Non OPD refrigerant with A1-classification
- Replacement in many R22-applications and equipments
- GWP (AR4) 3143, please note serviceban in EU 517/2014
- Significantly lower discharge temperature than R22
